

WaterGlow™ LED Lighting

Kasco offers superior illumination for your floating fountain with the "green technology" of LED lighting. These new kits offer cutting-edge technology for creating a vibrant nighttime display for your floating fountain.

Includes all colors shown

Innovative design by Kasco

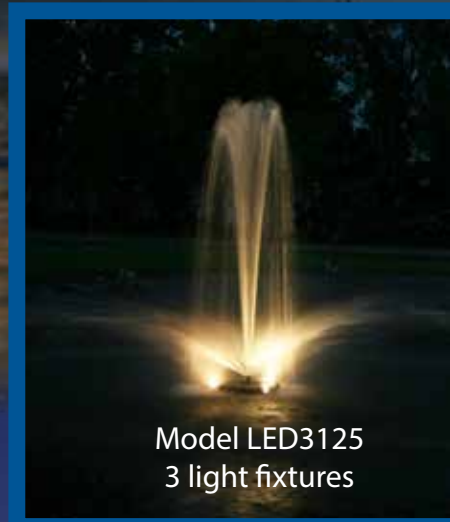

- A "warm" light from an LED that makes a natural glow.
- Quality materials are non-corrosive and salt-water ready
- Compact fixture installs on Kasco's full line (1/2-7.5 HP) of fountains
- Available in sets of 3 or 6 light fixtures
- Each fixture includes a waterproof connector, allowing for individual replacement of fixtures in the field.
- Includes 6 color choices (white, blue, amber, red, green, pink)

Less Expensive Price and Lower Cost of Operation

- Kasco's LED lights offer the best value and are less expensive than comparable halogen and other LED alternatives on the market.
- Efficient operation at only 9 watts of power consumption per fixture.

Long Life & Reduced Maintenance

- Permanently sealed fixtures with bulb life of 50,000 hours.
- Less heat produced reduces cleaning of lenses from mineral and film deposits.
- No bulb expense, no gaskets, and no labor involved in yearly bulb replacement.
